

# THUTHUZELA

## CARE CENTRE

Turning Victims into Survivors

**The Thuthuzela Care Centre (TCC) integrated approach to rape care management is one of respect, comfort, restoring dignity and ensuring justice for the girls, boys, women and men who are victims of sexual violence.**

**Thuthuzela Care Centres** are one-stop facilities that have been introduced as a critical part of South Africa’s anti-rape strategy, aiming to reduce secondary victimisation, improve conviction rates and reduce the cycle time for finalisation of cases.

The **Thuthuzela** project is led by the NPA’s **Sexual Offences and Community Affairs Unit (SOCA)**, in partnership with various departments and donors as a response to the urgent need for an integrated strategy for prevention, response and support for rape victims. Since its establishment, the **SOCA Unit** has been working to develop best practices and policies that seek to eradicate victimisation of women and children, while improving prosecution, particularly in the areas of sexual offences, maintenance, child justice and domestic violence.

The context: Rape is complex and has a wide impact in society ...

**Thuthuzela Care Centre operations: How does the TCC work?**

- Step 1:** You can report a rape case directly to a TCC (based at community clinics or hospitals) or to a police station
- Step 2:** TCC staff will assist to get you immediate medical attention at the Centre
- Step 3:** TCC staff will arrange counselling services at the Centre
- Step 4:** TCC staff will assist you to open a police case (if you want to do so immediately or even at a later stage)
- Step 5:** TCC staff will arrange for on-going counselling and court preparation (if the case goes on trial)

**Thuthuzela Care Centres** operate best in public hospitals close to communities where the incidence of rape is particularly high. They are also linked to sexual offences courts, which are staffed by skilled prosecutors, social workers, magistrates, NGOs and police, and located in close proximity to the centres.

The s are facilitated by a top level inter-departmental management team comprised of the departments of Justice, Health, Education, Treasury, Correctional Services, Police, Social Development and designated civil society organisations.

**Thuthuzela's** integrated approach to rape care is one of respect, comfort, restoring dignity and ensuring justice for children, women and men who are victims of sexual violence. When reporting, the rape victim is removed from crowds and intimidating environments, such as at the police station, to a more victim-friendly environment before being transported by police or an ambulance to the **Thuthuzela Care Centre** at the hospital. Enroute, the victim receives comfort and crisis counseling from a trained ambulance volunteer or police officer.

Once at the **Thuthuzela Care Centre**, the victim is ushered to a quiet, private space, welcomed by the site-coordinator. A doctor is immediately summoned to conduct a medical examination. The victim is then given Information on the procedures to be performed. The victim (patient) signs a consent form for medical examination and blood specimens. If the medical examination happens within 72 hours of the rape, DNA and PEP is conducted, after which the victim is offered the opportunity to take a bath or shower and to change into clean clothes.

After that, the investigating officer on call at the centre takes the victim's statement. Thereafter, the victim receives appropriate medication and is given a follow-up date for further medical treatment, before being transported home.

"This process ensures that service providers are available to a rape survivor in one location, rather than her being shuttled around throughout the criminal justice system", says Advocate Thoko Majokweni, Head of the SOCA unit.

# BLUEPRINT Thuthuzela Care Centres

Specially trained staff, access to variety of professional services...  
Prosecutor, Police, Doctor, Social Worker, Case Managers on one site

## The caring process

Walk-in care

Accessible facilities

Emotional and physical support  
Clean accessible facilities

Shower, bathroom  
Clean clothes  
Comforting doctor, rape kit  
Statement taken after bathing

## Caring for the young victims of rape

Doctors at Thuthuzela Care Centres have reported seeing increased numbers of child victims. Sadly, some of them are as young as three months. Accordingly, the need for specially trained child-friendly nurses or care-givers to receive and comfort children before they are taken for examination is critical.

## *Thuthuzela Care Centre, child friendly environments*

Various donors have also contributed to making the model child-friendly, through offering technical expertise for the installation and availability of special equipment and furniture. These include two way-mirrors, posters, CCTV, drawings, and anatomically correct dolls comprising five family members, to help prepare children to appear in court, should that become necessary.

### **Impact of the Thuthuzela Care Centres**

The Thuthuzela model has already improved the process of reporting and prosecuting rape and other sexual offences, and reducing secondary trauma to survivors as the entire process takes place in a dignified and friendly environment.

According to Advocate Majokweni, “At the heart of the success of the Thuthuzela approach is the professional medical and legal interface and a high degree of cooperation between victim and service providers from reporting through investigation and prosecution of the crime, leading up to conviction of the offender. This has led to an increase in conviction rates. Higher levels of awareness have resulted in an increased numbers of cases reported at police stations and taken immediately to a Thuthuzela Care Centre”.

### **Services offered at the Thuthuzela Care Centres (TCCs)**

- Welcome and comfort from a site co-coordinator or nurse.
- An explanation of how the medical examination will be conducted and what clothing might be taken for evidence.
- A consent form to sign that allows the doctor to conduct the medical examination.
- A nurse in the examination room.
- After the medical examination, there are bath or shower facilities for victim use.
- An investigation officer will interview the survivor and take his/her statement.
- A social worker or nurse will offer counseling.
- A nurse arranges for follow-up visits, treatment and medication for Sexually Transmitted Infections (STIs), HIV and AIDS.
- A referral letter or appointment will be made for long-term counseling.
- The victim (survivor) is offered transportation home by an ambulance or the investigating officer.
- Arrangements for the survivor to go to a place of safety, if necessary.
- Consultations with a specialist prosecutor before the case go to court.
- Court preparation by a victim assistant officer.
- An explanation of the outcome and update of the trial process by a case manager.

## **I have been raped ... what do I do?**

- Do NOT wash or change clothes – Clothes can provide important evidence of the rape.
  - Report the rape to someone you trust, the police or the TCC, as soon as possible.
  - If there is no TCC, go immediately to the nearest clinic/ hospital for medical assistance.

### **EMERGENCY CONTACTS**

- Lifeline 0800 555 555
